December 26, 1963

Thomas F. Ahrensfeld, Esq.
Associate General Counsel and Secretary
Philip Morris Incorporated
100 Park Avenue
New York 17, New York

Dear Tom:

For your information I am enclosing a copy of the article which appeared recently in the New England Journal of Medicine entitled "Components of Cigarette Smoke with Ciliary-Depressant Activity" by Drs. Kensler and Battista of Arthur D. Little Incorporated. It is interesting to see that they found that phenol vapor when used in four times its concentration in cigarette smoke failed to produce a large degree of ciliary depression (page 1164).

Sincerely,

AH:fg
